

STARMed Ventukit

Hood for CPAP therapy with built-in Venturi flow driver

Critical Care ▪ Non-invasive ventilation ▪ STARMed

STARMed Ventukit CPAP hood with Venturi flow driver

StarMed Ventukit

StarMed Ventukit is a complete and easy to use system simply activated by connecting to the O₂ source available in the hospital departments. StarMed Ventukit unique design consists of oxygen tubes and a Venturi flow driver integral to a CPAP hood. The kit also includes an adjustable PEEP valve for immediate therapy activation.

Technical Features

- The integrated Venturi flow driver can generate high patient flows while consuming a reduced amount of compressed oxygen
- O₂% can be adjusted from 40% to 100% at each PEEP level
- The adjustable PEEP valve can provide patient pressures in a range of settings up to 20 cmH₂O
- The user is guided by a performance table integral to the product, for independent PEEP and O₂% settings

Ventukit CPAP hood with Venturi flow driver, bi-directional anti-asphyxiation valve and patient access port, adjustable PEEP valve, ear plugs and measuring tape

Performance table subject to changes. Always refer to product labelling.

Requirement		Setting	Flow delivered
